

JOB VACANCY

Electronics Design Engineer

Fordingbridge, Hants, UK

Salary: Competitive

Company

We are a fast-growing international electronics company, constantly developing new products and pushing into new markets. Are you looking for a career in Electronic Product Design that can really take off and grow with us?

We need a highly motivated individual to become part of our team to help drive the company forwards.

The Job

- To develop and design new products expanding our existing range.
- Be a key player in shaping our new product roadmap, generating new product ideas and seeing them come to fruition.
- Work within our multidisciplinary teams, using your skills in electronic and embedded software development, prototyping and design.
- Continually improve existing products through the use of the latest technologies, to maintain our market leading position.
- Liaise with our manufacturing teams in the UK and Far East to see your products safely into full scale production.

The Person

- Minimum 2 years' experience in an electronics product design environment.
- Embedded software development using C and/or C++.
- Good knowledge of analogue and digital electronic circuits, including low power microprocessors and microcontrollers.
- HND or higher in Electronic Engineering.

Benefits include:

- Professional development plan with the opportunity to progress
- Responsibilities commensurate with achievement
- Discretionary bonuses
- Free use of onsite gym

A clean driving licence is required. A non-smoker is essential.
