

JOB VACANCY

Production Engineer

Fordingbridge, Hants, UK

Salary: Competitive

Role

To support UK and sub-contracted manufacturing through the development and maintenance of build documentation, production jigs, test specifications and also the development of processes and procedures throughout the company to increase efficiency and quality.

Duties and Responsibilities

- Develop and maintain build documentation, test specifications and also the improvement of processes and procedures throughout the company.
- To develop and change documentation and tooling in line with our documented procedures.
- To maintain confidentiality and professionalism in relationships with both other staff, customers and suppliers at all times.
- To work in a safe and efficient manner at all times, adhering to policies and procedures relating to Health and Safety.
- When required, support other areas of the business when and where the need arises as directed by senior managers.

Skills

- Some experience in an engineering role within a technology industry would be advantageous. The candidate may have held an electronic engineering role in the past, and must have a keen interest in electronic products with a good technical understanding.
- A good background knowledge of electronic components would be beneficial, gained as a hobbyist or professional.
- Excellent communication skills, both verbal and non-verbal.
- Friendly and professional attitude when dealing with colleagues, customers and suppliers.
- Computer literate, with the ability to use all aspects of MS Office.
- The ability to adapt to change and meet deadlines, whilst remaining calm under pressure.
- Self-motivated and able to work unsupervised.
- Willing to undertake any training relevant to the role.

Benefits include:

- Professional development plan with the opportunity to progress
- Responsibilities commensurate with achievement
- Discretionary bonuses
- Free use of onsite gym

A clean driving licence is required. A non-smoker is essential.
