

JOB VACANCY

Production Engineer

Fordingbridge, Hants, UK

This role is an exciting opportunity for someone with a keen interest in technology. We are looking for individuals who are not afraid of being a leader when it comes to developing processes and procedures.

The successful candidate we are looking for could either be an experienced Production Engineer looking for a new challenge or someone with technical background, either in Engineering or has A Levels in STEM subjects. We are looking for someone who is passionate about technology and keen on improving processes and procedures throughout the company as well as supporting the production process.

Duties:

- Develop and maintain build documentation, test specifications and also the improvement of processes and procedures throughout the company.
- The design and development of tooling, jigs and fixture to support the production process.
- Provide technical support to in-house production and subcontractors.
- To maintain confidentiality and professionalism in relationships with both other staff, customers and suppliers at all times. To work in a safe and efficient manner at all times, adhering to policies and procedures relating to Health and Safety.
- When required, support other areas of the business when and where the need arises as directed by senior managers.

In return we offer a great package including coaching, training and many rewards and benefits.

We offer advantages such as sabbaticals, generous pensions, discretionary bonuses, share option schemes and work experience.

The opportunities are global – with offices in the UK, US and Hong Kong there's no telling what prospects your career with us might give you.

Non Smokers Only
